SKILLS

- **Languages:** Python, C, C++, Java, JavaScript, Golang
- **Technologies:** HTML5, CSS3, SQL, Flask
- **Databases/Tools:** SQLite, PostgreSQL, Git, GitHub, VS Code, Postman
- **Soft Skills:** Problem solving, Team collaboration, Time management, Adaptability

PROJECTS

Chimera API Workspace | [GitHub](#)

August 2026 - Present

- Building a developer-focused API workspace for organizing, configuring, executing, and inspecting HTTP requests through a unified interface.
- Designed and implemented a layered **Flask backend** using **Route** → **Controller** → **Service** → **Repository** → **Model** architecture with dependency injection and in-memory storage.
- Implemented **Project and Endpoint CRUD**, hierarchical project–endpoint ownership, and reusable request definitions supporting methods, URLs, query parameters, headers, and request bodies.
- Built a backend-mediated **HTTP execution pipeline** with request validation, JSON handling, external API execution, standardized responses, and dynamic frontend rendering.
- **Tech Stack:** HTML5, CSS3, JavaScript, Python, Flask

MemoryTrail Personal Travel Memory Journal | [GitHub](#)

Feb 2026

- Collaborated in a four-member team to build *MemoryTrail*, a full-stack web application for documenting travel experiences with trips, photos, locations, and notes.
- Collaborated in a four-member team to build *MemoryTrail*, a full-stack web application for documenting travel experiences with trips, photos, locations, and notes.
- Designed and tested backend models and routes for **users, trips, and memories**, ensuring reliable integration with the React frontend.
- Worked under hackathon constraints to deliver features like **memory timeline, trip statistics, and location data storage**, gaining experience in modular backend architecture and cross-team collaboration.
- **Tech Stack:** HTML5, CSS3, JavaScript, React, Vite, Node.js, Express.js, MongoDB, Mongoose, JWT, bcrypt.js, Multer

Synclip Real-Time Text Sharing Platform | [GitHub](#)

Nov 2025 - Dec 2025

- Collaborated on building a vibe-coded real-time cross-device text sync/sharing platform, supporting WebSocket enabled text transfer between Windows and Android.
- Implemented the mobile app side of the platform with Flutter, making it capable of communicating with the JavaScript enabled web side through Firebase Firestore backend.
- Tested the platform rigorously by sending text from app, receiving from web and simultaneous sharing & deleting from both ends to ensure it syncs seamlessly with no race conditions or other bugs.
- **Tech Stack:** HTML5, CSS3, JavaScript, Flutter, Web Clipboard API, Firebase Firestore

CERTIFICATES

- Go (Golang) Masterclass: Learn Like a Google Engineer | [Udemy](#) Ongoing
- GO Programming for Everyone : Part 2 | [Coursera](#) Jan 2026
- GO Programming for Everyone : Part 1 | [Coursera](#) Dec 2025

ACHIEVEMENTS

- Solved around **50** programming problems on online coding platforms during regular practice and learning.
- Reached the final round of the 24 hour, three round Infernoverse hackathon as a part of a four member team.
- Landed second runner up position in CSE Section of the Year 2025 Quiz category.

EDUCATION

Lovely Professional University	Phagwara, Punjab
• <i>Bachelor of Technology - Computer Science and Engineering; CGPA: 7.56</i>	<i>Aug 2025 - Present</i>
City Montessori School	Lucknow, Uttar Pradesh
• <i>Higher Secondary Education; Percentage: 91.0%</i>	<i>May 2022 - Mar 2024</i>
City Montessori School	Lucknow, Uttar Pradesh
• <i>Secondary Education; Percentage: 96.8%</i>	<i>May 2021 - Mar 2022</i>
